Introduction

Full Stack Developer with **1.5+ year Experience** building scalable applications, RESTful APIs and database-driven systems. Strong foundational skills in performance optimization, clean architecture and smooth frontend-backend integration. Worked on SaaS products with a focus on reliability and real-world impact.

Education

Degree/Certificate	Institute	CGPA/Percentage	Passing Year	University
MCA - External	Sinhgad Institute of Management	appearing	2026	SPPU
BCS	B.P.H.E. Society's Ahmednagar College	8.78	2024	SPPU
Higher Secondary	New Arts, Commerce & Science College A.Nagar	89.17%	2021	State Board
Secondary	Damodar Vidhate Highschool	86.40%	2019	State Board

Skills

- **Languages:** Java, JavaScript, TypeScript
- **Backend:** Node.js (Express), Spring Boot
- **Frontend:** Angular-19, React, Tailwind CSS, Bootstrap
- **Databases :** SQL Server, PostgreSQL, MongoDB (Basic)
- **DevOps & Tools:** Git, Docker, Nginx, AWS, Linux, Postman, REST API
- **Core Concepts:** OOP, MVC Pattern, Data Structures & Algorithms, DBMS, JWT/OAuth

Experience

Full Stack Developer | S-IT Solutions

Jan 2026 – Present

- Developing Node.js and React with PostgreSQL application for Resello, a Cashify-style device and vehicle reselling platform.
- Built Roster and seat allocation modules for a Government ZP System with reservation logic and statutory security controls.
- Containerized services with Docker, deployed on AWS, and integrated S3 for cloud-based image and document storage.

Software Developer | Retailware Softech

Sept 2024 – Jan 2026

- Built Angular and PHP-based CRM and merchant apps integrated with ONDC REST APIs using TypeScript and SQL Server.
- Developed Trouble Ticket and Grievance modules for merchant-facing ONDC workflows with role-based access control.
- Delivered features iteratively in Agile/Scrum sprints collaborating with cross-functional teams.

Full Stack Web Developer Intern | A2Z IT Hub

Mar – August 2024

- Contributed to 3 web apps using React, Node.js & MySQL, building UI, integrating APIs and managing backend logic.
- Used Git for version control and collaborated in Agile sprints with the development team.

Projects

Waiter less Restaurant (Node.js, React.js, MySQL)

- Designed a comprehensive solution for table bookings, order processing and invoicing, streamlining operations.
- Developed a waiter-less service model for online patrons, automating the process from reservation to payment.
- Established a centralized invoicing system with data archiving and analytics, optimizing pricing and menu offerings.

E-Commerce Platform (Codeigniter, MySQL)

- Constructed a feature-rich online marketplace with advanced product categorization and intelligent search functionality.
- Integrated secure payment gateways, order tracking and user profile management, increasing customer retention.
- Developed an admin console for inventory, category and order oversight with data visualization tools.

Exam Portal (Spring Boot, Angular, PostgreSQL)

- Platform for teachers to create quizzes and students to access notes, attempt tests and track progress with analytics.
- Teacher dashboard for uploading questions, creating tests and analyzing student performance metrics.
- Secure authentication, role-based access and real-time updates for seamless functionality.
